MANAGED SERVICES & SUPPORT

Grow Your Capabilities, Not Your Team

InflexionPoint offers unparalleled managed services and support tailored to ensure the flawless operation of your infrastructure, the backbone of your business.

With a suite of services designed to meet the unique challenges of operating in a converged IT-OT environment, we are not just a support provider; we are a strategic partner committed to propelling your operations to new heights.

As your partner, we augment your team and extend your capabilities. Our managed services and support transcend traditional IT boundaries, embracing the complex network of systems and devices pivotal to your infrastructure's success.

From SCADA software and industrial hardware to advanced networking and custom-developed applications, we blend IT and OT support seamlessly, augmenting your team to help you manage your converged operation and drive your business forward.

**Disaster Recovery and
Business Continuity**

**Designed for Converged
IT-OT Environments**

**Remote Monitoring and
Management**

**Secure Operational
Control from Anywhere**

Empowered with Data

Unlock the power of data-driven decision-making with our comprehensive reports and analytics — all delivered through a secure web portal, for maximum confidentiality and convenience. Monthly analyses provide snapshots of service performance, including incident metrics and Service Level Targets (SLT) adherence, while our yearly summaries offer a broader view of long-term trends, areas for improvement, and strategic guidance to optimize service delivery.

CASE STUDY

Remote Site Management for Renewable Energy Provider

- SJI collects natural gas across dozens of farms; no full-time staff on site
- We delivered 'single pane of glass' to remotely manage all OEM equipment: controls; MES; cybersecurity
- See and manage all OT equipment in real time from secure web portal
- 24/7 support; we handle 90-100 tickets per site per month
- Savings \$40K/month; pays for itself
